

ASSET INSIGHTS LIMITED

QEHS Policy

Collectively Asset Insights has over 75 years' experience helping clients improve their Asset Performance Management (APM) to achieve their business goals. Our Vision is simple:

OUR VISION

To add value to our clients, delivering pioneering APM Solutions shaped by practical expertise that transform asset performance and deliver operational efficiencies, whilst providing confidence that we manage information security risks effectively.

To do this we aim to provide insight and inform asset performance strategies, whilst remaining focused on the finer detail and little things that add real value to our clients' transformation efforts.

This focus is expressed in our business objectives - together we will:

Deliver sustainable and profitable growth whilst maintaining a healthy cash flow.

Create a dynamic organisation that leverages innovation & partnerships and is prepared for scale.

Create unique and secure APM solutions and services that help asset intensive organisations differentiate and deliver business value.

Align with client H&S, sustainability and security goals to deliver a more balanced and consistent focus throughout the lifecycle.

Bring passion and drive to every engagement and be relentless in our approach to delivering exemplary customer service.

These five statements reflect the needs and expectations of our stakeholders, our people, our customers, our supply chain partners and society in general. They are our commitment to improving the quality, security, health, safety and environmental performance of our solutions and services and the activities which produce them.

The objectives and resources required to meet these commitments are identified within our Business Plan. This approach provides a line of sight between our business objectives and individual targets and goals.

The Asset Insights Board meet regularly to review performance against these objectives, ensure we continue to fulfil our legal and compliance obligations, and identify opportunities to push the business further and achieve better results. We are committed to sharing this information with our people and being transparent in our dealings with our stakeholders.

Linking our business objectives to Environmental, H&S and Information Security Management:

Our Objectives	From an Environmental perspective we achieve this:	From an H&S perspective we achieve this:	From an Information Security perspective we achieve this:
Deliver sustainable and profitable growth whilst maintaining a healthy cash flow.	By managing the environmental impact of our activities and solutions consistently across the full asset lifecycle e.g. by providing solutions which make our clients assets more resilient and efficient to own and operate.	By always following our client H&S directives and policies and by delivering services and solutions that inherently minimise H&S risk, are safe to implement and/or improve operational safety, health and wellbeing.	By delivering services and solutions that inherently minimise Information Security risks and which are secure by design.
Create a dynamic organisation that leverages innovation & partnerships and is prepared for scale.	By constantly seeking out opportunities to enhance the environmental performance of our services and solutions e.g. through the adoption of innovative technologies and approaches which deliver sustainability and environmental benefits in our target sectors. Examples include; equipment efficiency, resilience, energy capture and reduced travel.	By constantly seeking out opportunities to enhance the health and safety performance of our solutions e.g. through the adoption of innovative technologies and approaches which reduce asset failure and resultant exposure to hazards, minimise H&S risk, ensure regulatory compliance or enhance the safety and wellbeing of the user and society in general.	By constantly seeking out opportunities to enhance the information security performance of our solutions e.g. through the adoption of innovative technologies and approaches which improve information security controls, minimise information security risks and ensure regulatory compliance or enhance the security and protection of the user and society in general.
Create unique APM solutions and services that help asset intensive organisations differentiate and deliver business value.	By collaborating with our people, partners and industry as a whole to foster a culture where everyone is aware of the Environmental aspects and impacts associated with our operations, solutions and services and focussed on taking a systematic, long term approach to improving Environmental outcomes and achieving performance targets.	By collaborating with our people, partners and industry as a whole to foster a culture where everyone is aware of the H&S risks associated with our operations, solutions and services and focussed on taking a strategic, risk-based, data-driven approach to improving H&S outcomes and achieving performance targets.	By collaborating with our people, partners and industry as a whole to foster a culture where everyone is aware of the information security risks associated with our operations, solutions and services and focussed on taking a strategic, risk-based, data-driven approach to improving information security outcomes and achieving performance targets.
Align with client H&S and sustainability goals to deliver a more balanced and consistent focus throughout the lifecycle.	By establishing strategic alignment to our clients goals we can have a more notable and lasting impact. When environmental risks and opportunities associated with our business and the solutions and services we supply are: 1. Considered alongside other business risks and opportunities as part of our Business Planning and Objective Setting process 2. Owned, actioned and resourced within our Business Plan (as appropriate)	By establishing strategic alignment to our clients goals we can have a more notable and lasting impact.
